SHARAD DUBEY

UI/UX-Focused Product Engineer | Data-Intensive Dashboards | Design Systems | AI/LLM Workflows | B2B/SaaS

India • +91-8922096699 • ersharaddubey@gmail.com

PROFESSIONAL SUMMARY

Product-focused professional with 10+ years of experience designing and building user-facing interfaces for B2B/SaaS, healthcare and enterprise products. Strong track record in translating complex, role-driven workflows into clear user flows, role-aware dashboards, real-time monitoring screens and reusable component structures. Hands-on experience with AI/LLM workflows (prompt engineering, image-to-prompt, OCR-based extraction), and comfortable working directly with product teams, founders and engineers to ship designs that are technically feasible and implemented accurately. Experienced in mentoring teams and presenting design and technical decisions to both technical and non-technical stakeholders.

CORE SKILLS

- **UX & Design Thinking:** User flows, information architecture, role-based interface design, interaction design, usability and accessibility fundamentals, responsive design, design-to-development handoff
- **Data-Intensive Interfaces:** Analytics dashboards, real-time queue and status monitoring, admin and multi-role dashboards, data visualization, low-stock and alert patterns
- **Design Systems & Components:** Reusable component libraries, modular UI architecture, consistent styling with Bootstrap and Tailwind CSS, state-driven UI modules
- **AI-Assisted Workflows:** Prompt engineering, LLM application workflows, image-to-prompt pipelines, OCR-based text extraction, iterative refinement and validation of AI output
- **Frontend Implementation:** React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Tailwind CSS
- **Backend & Data (for feasibility and collaboration):** Node.js, Express.js, REST APIs, WebSocket / Socket.IO, MongoDB, MySQL, PostgreSQL
- **Security-Aware UX:** Role-based access flows, PIN-protected workflows, consent flows, PHI/data-protection-aware interface design

- **Cloud & Delivery:** AWS EC2, AWS S3, production deployment and performance optimization
- **Collaboration & Leadership:** Cross-functional collaboration, mentoring, stakeholder communication, technical decision-making

SELECTED PROJECTS

1. CLINICFLOW | Multi-Clinic Operations Platform (Data-Heavy B2B Dashboard)

React.js, Node.js, Express.js, MongoDB, Socket.IO, AWS

- Designed and built role-specific dashboards for Admin, Reception, Doctor and Inventory users, turning complex operational workflows into clear, task-focused screens.
- Designed a real-time queue and waiting-list experience with live status updates across reception desks and doctor screens.
- Built a centralized admin dashboard with multi-branch support and configurable settings.
- Created analytics dashboards for patient footfall, revenue trends, doctor utilization and inventory turnover.
- Designed inventory, billing and invoice flows with low-stock alerts, expiry tracking and payment-status indicators.
- Owned user flows, API contracts and production deployment end to end.

2. MEDSECURE | HIPAA-Compliant Healthcare Management System

React.js, Node.js, Express.js, MongoDB, JWT, RBAC, AWS

- Designed role-aware portals for Doctors, Nurses, Admin, Receptionist and Patient roles, with each role seeing only what it needs.
- Designed a patient portal covering appointment booking, medical history, prescription download and secure messaging.
- Designed consent and data-sharing flows that require patient authorization before sensitive data is accessed.
- Balanced strict security and compliance requirements with a usable interface, including audit-aware actions and session handling.
- Structured the product into modular services (Patient, Appointment, EMR, Billing, Notification) for clean separation and easier iteration.

3. PROMPT FACTORY | AI Prompt & LLM Security Platform

React.js, Node.js, Express.js, MongoDB, AI/LLM services, OCR, AWS | Currently in development

- Architecting an AI-driven workflow that converts an input image into a structured generation prompt and supports repeatable regeneration.
- Designed a PIN-protected prompt access flow, including a deliberate incorrect-PIN response that returns a different visual output.
- Improving AI output quality through multi-pass rendering, iterative refinement and pattern-mismatch tracking.
- Using OCR to extract embedded text from images and store it as structured data for documentation workflows.
- Hands-on experience evaluating and refining AI output, relevant to AI-assisted ideation, research synthesis and prototyping.

PROFESSIONAL EXPERIENCE

Senior Software Developer | Avisha Global Technologies Consultancy Services | Allahabad | Dec 2025 – Present

- Designed and developed a real-time chat system with React.js, Node.js and Socket.IO.
- Built secure, role-based experiences with JWT authentication and role-based access control.
- Worked hands-on across architecture, API integration, debugging and performance optimization.

Senior Web Developer | Aabhyasa Technologies Pvt. Ltd. | Varanasi | Nov 2021 – Nov 2025

- Managed and mentored a cross-functional team of 10 developers and established coding and quality standards.
- Led end-to-end product design for healthcare webinar platforms and enterprise SaaS products with secure user and data-access workflows.
- Designed automation workflows and optimized service components, reducing document processing time by 50%.

Software Developer | Pride Solution | Prayagraj | Jun 2020 – Oct 2021

- Led a team of 5 developers to design and deliver production applications.
- Designed ERP frontend architecture with state-driven modules, inventory trackers and role-based dashboards.
- Built data visualization systems for government COVID-19 tracking applications.

- Improved interaction speed by approximately 40% through frontend and state-management optimization.

Software Developer | Edunext Technologies Pvt. Ltd. | Noida | Jun 2019 – Jun 2020

- Designed responsive interfaces using HTML5, CSS3, JavaScript and Bootstrap.
- Integrated dynamic backend components with frontend applications.
- Optimized website assets for faster loading.

Software Developer | Vapsoft Technologies Pvt. Ltd. | Prayagraj | Oct 2015 – May 2019

- Developed dynamic web applications using PHP and MySQL.
- Integrated payment gateway, SMS and email APIs.
- Applied XSS, CSRF and SQL injection prevention practices.

EDUCATION

B.Tech – Kashi Institute of Technology, Varanasi | 2015
